-- FOR IMMEDIATE RELEASE --

## **DYNAFLOW RESEARCH GROUP (“DRG”) Enters into Reseller Agreement with Quality Professional Software (“QPS”)**

RIJSWIJK, The Netherlands – January 24, 2024 (Dynaflow Research Group BV) – DYNAFLOW RESEARCH GROUP BV (“DRG”) announces that DRG and Quality Professional Software (“QPS”), based in Lima, Peru, have entered into a formal agreement for QPS to act as a reseller of DRG software products in South America, Central America, and Mexico.

With offices in Peru and Chile, and staff in Peru, Chile, Bolivia, and Ecuador, QPS has been representing and delivering high-value technical software products and support to Spanish-speaking customers in the Americas since 2005.

Mr. Niels Bos, DRG’s Managing Partner, stated “DRG will benefit from a more direct, highly competent technical sales and marketing channel in the Americas, and QPS will achieve a broader portfolio of design and analysis software products to offer their customers. We are very excited to build and grow this new relationship, and expand the user base for BOSfluids, BOSpulse, and ISOtracer into new markets with a reliable and well-known local software reseller.”

Mr. Bos added “BOSfluids is an extremely capable product for transient water hammer and surge analysis in piping systems. BOSpulse is an extremely efficient, intuitive, and feature-rich product for pulsation analysis related to compressors and pumps as per the API 618 and API 674 standards. Not many software reseller groups are able to communicate the technical details of our software products, but QPS has shown they can and we are happy to be working with them.”

Mr. Luis Dante Garay, QPS’s General Manager, stated “QPS has been looking for an opportunity to provide and represent advanced fluid-flow modeling and analysis software to the markets we serve and DRG’s core products, BOSfluids and BOSpulse, are a perfect fit. We know the value provided by these solutions, and we know our customers will also see and experience this value.”

The collaboration between DRG and QPS is a significant milestone for both companies as they combine their complementary expertise and market leadership to deliver cutting-edge technologies for fluid-flow analysis and modelling in the region.

### **About Dynaflow Research Group**

Dynaflow Research Group, a leading consultancy with 35+ years of experience, offers specialized and sustainable engineering solutions. Renowned for our expertise in flow dynamics, vibrations, and fiberglass piping, our unique approach integrates physics, engineering, and cutting-edge software to deliver lasting solutions for our clients and make a positive impact on society. Our software packages, BOSfluids, BOSpulse, and ISOtracer, are well-known and used on a global scale by many of the largest engineering firms. Explore more at <https://dynaflow.com/>

### **About Quality Professional Software**

Based in Lima, Peru, in business since 2005, Quality Professional Software operates throughout South America, Central America, and Mexico. QPS provides a wide array of specialty and technical design and analysis software solutions, along with complimentary services, to the Mining, Oil & Gas, Chemical, Petrochemical, Environmental, Construction, and Food & Beverage industries. QPS currently represents CADWorx Plant Professional, CAESAR II, PVELITE, TANK, CHEMCAD,

BRICSCAD, FluidFlow, and now BOSfluids and BOSpulse from DRG. More information on our company can be found at <https://www.qualityprofessionalsoftware.com/>
